Course Description

This course explores the local, national, and global forces that have shaped Canada's national identity from World War I to the present. Students will investigate the challenges presented by economic, social, and technological changes and explore the contributions of individuals and groups to Canadian culture and society during this period. Students will use critical-thinking and communication skills to evaluate various interpretations of the issues and events of the period and to present their own points of view.

How This Course Supports The Ontario Catholic School Graduate Expectations

One of the strongest themes found in the teachings of the Catholic Church concerns social justice. This theme refers to a number of issues raised in this course. The respect for human rights includes the respect for individual rights, Aboriginal rights, labour rights, feminist rights, and cultural group rights. The teachings of Christ concerning the need for community are reflected in Canada's constant struggle to define that community. This course presents students with historic issues faced by Canadians and interprets them in light of the gospel teachings. Students recognize that there are certain gospel values such as social justice values that transcend history and are still relevant for the future. Students recognize that the story of Canada is not simply dates, events, and personalities but also the struggle to incorporate values in the face of rapid changes and challenges.
